

Sunoco Moly 3% Greases: EP-1 and EP-2

Product Overview

- A lithium complex grease with extreme pressure (EP) additives, containing high-quality Molybdenum Disulfide.
- Uniquely designed to offer high temperature and high shock performance in heavy-duty applications.
- Formulated to be a balanced premium grease that has excellent pumpability, adhesion, and mechanical stability to provide superior wear protection and extended equipment service life.

Features and Benefits

- Lithium Complex
- 3% Molybdenum Disulfide: high-quality lubricating solids
- High-temperature Grease
- Excellent film strength for wear protection, high shock and high loads
- Excellent pumpability in automated systems
- Technical Fine Grade Moly/MOS2

Applications

- Designed for heavily-loaded equipment in on-road and off-road industrial uses.
- Withstands the most challenging and demanding environments where wear and shock load protection are required.
- Can be used in plan journal bearings, kingpins, hinge/bucket pins, ball joints, and any other severe duty applications requiring Molybdenum Disulfide.

PERFORMANCE DESCRIPTION	TEST METHOD	CONDITION	TYPICAL VALUES	
			EP-1 PRODUCT CODE: 72313	EP-2 PRODUCT CODE: 94513
Color		Visual	Black	Black
Appearance			Smooth & Tacky	Smooth & Tacky
Base Oil Viscosity	ASTM D-445	40°C	260 cSt	260 cSt
Thickener			Lithium Complex	Lithium Complex
Dropping Point	ASTM D-2265	°F	500	500
NLGI Grade	ASTM D-217		1	2
Worked Penetration	ASTM D-217	25°C (77°F)	320	270
Copper Corrosion	ASTM D-4048		1B	1B
Rust Prevention	ASTM D-1743		Pass	Pass
4-Ball EP Weld Point	ASTM D-2596	kg	620	620
Load Wear Index	ASTM D-2596		110	110
4-Ball Wear Scar	ASTM D-2266	mm	0.55	0.55
Timken OK Load	ASTM D-2509		60	60
Mobility	US Steel	@60°F, g/Min	450	250
Water Spray-off	ASTM D-4049	%	25	10
Water Washout	ASTM D-1264	@175°F, %	3.2	1.5
Meets GC-LB Specifications	ASTM D-4950		Yes	Yes
